

## About EvexiPEL

At EvexiPEL, our mission is to positively impact people's lives through hormone balance and optimization. Our evidence based medical approach to hormone pellet therapy has resulted in successfully treating thousands of patients suffering with hormone imbalances.

The EvexiPEL Method is the result of collaboration between some of the most recognized hormone replacement experts in the United States and FarmaKeio Outsourcing, an FDA certified 503B manufacturing facility based in Southlake, Texas. This integrative approach to hormone pellet therapy provides superior patient outcomes when compared to other forms of pellet therapy, and patients experience the difference!

EvexiPEL Certified Practitioners have been trained by world renowned experts who specialize in hormone restoration and thyroid optimization. These practitioners are courageous individuals with a strong desire to obtain optimal health for themselves and their patients.

EvexiPEL practitioners do more than implant hormone pellets or write prescriptions. To help ensure patients experience optimum results, EvexiPEL recruits and trains only the best of the best medical practitioners who are committed to an integrated and functional approach to healing – getting to the root of patient's health issues – instead of just treating symptoms.

Read on to see if EvexiPEL Hormone Pellet Therapy may be right for you or your loved ones!
